Installation dimensions

Length and hole pattern of the cabinet runner

Length cabinet runner A	208	240	272	304	336
Hole distance B	160	192	224	256	288

The low-cost FORTUNA-single extension runners with self-closing-mechanism obtain optimal running characteristics in vertical and horizontal direction. Loads of up to 25 kg absorbed and evenly spread due to the precise construction of the steel profiles. The optional soft-closing-mechanism provides silent and effortless closing of the drawers. Alternatively, also available with push-open. This function enables by gently pushing of the drawer front an automatic opening of the runners.

- Proven single extension runner for a reasonable price
- Either with self-closing, soft-closing or push-open
- Lengths from 250 to 550 mm
- Loading capacity up to 25 kg
- Stepless height adjustment
- Excellent runability
- Available with safety catch or locking device
- Short delivery time thanks to warehouse stock

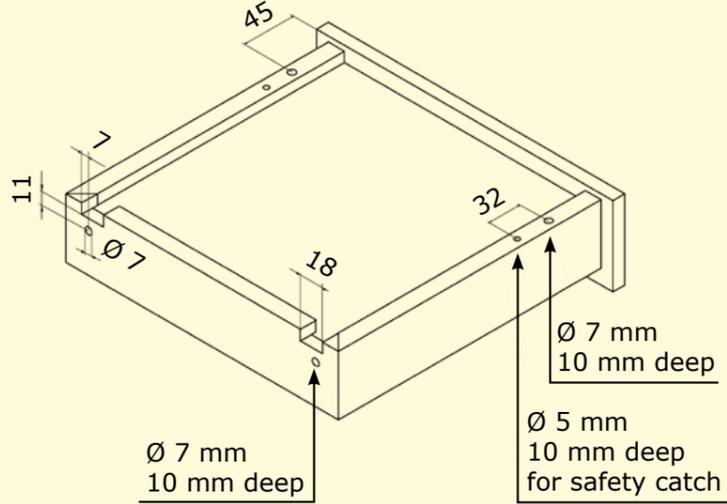

Brand quality of European origin.
With LGA test certificate approved by TÜV Rheinland.

Drillings and punch-outs in the drawer

Locking device
With the new locking device, the assembly is particularly quick and easy: simply place the drawer on the runners and push the latch into the mounting holes of the drawer front.
